Summary

Experienced **DevOps Engineer** with expertise in **high-availability system design, Linux & Docker deployments, and cloud infrastructure management**. Skilled in **Kubernetes, CI/CD, monitoring, disaster recovery, and troubleshooting**. Proven record of leading teams, mentoring juniors, and building custom automation and infra tools.

Experience

KocharTech – DevOps Engineer

Jun 2023 – Present | Amritsar, India

- Lead DevOps team; mentor interns & new engineers.
- Designed **HA system architectures** ensuring node-failure tolerance.
- Managed **cloud infrastructure** and production deployments with Docker; wrote and optimized **Dockerfiles**.
- Built **CI/CD pipelines using Jenkins** from scratch.
- Configured **DB clusters** (MySQL, PostgreSQL, MongoDB, Clickhouse, Redis, KeyDB) with HA, backup & restore.
- Deployed **Keycloak in HA**, integrated **SAML & OIDC-based identity providers (SSO)**.
- Implemented **disaster recovery strategies** and resolved high-priority infra issues.
- Developed an **in-house cloud infra management portal** for project-instance mapping, backup tracking, and monitoring.
- Automated tasks with **Bash & Python scripting**.

KocharTech – IT Intern

Jun 2022 – May 2023 | Amritsar, India

- Built **monitoring stack** (Prometheus, Grafana, Loki, Fluentbit, Alertmanager) from scratch.
- Created **custom exporters & Grafana dashboards with PromQL**.
- Automated **Linux user backups to S3**.
- Developed **device/system tracking portal** with Django + MQTT.

TheCodeWork – Full Stack Intern

Jun 2021 – Oct 2021

Education

MCA – Lovely Professional University (2021 – 2023)

BCA – Dev Sanskrit Vishwavidyalaya, Haridwar (2018 – 2021)

Key Skills

DevOps & Infra: Linux, Docker (optimized Dockerfiles), Kubernetes, Jenkins, Prometheus, Grafana, Loki, Keycloak (SSO, SAML, OIDC)

Databases: MySQL, PostgreSQL, MongoDB, Clickhouse, Redis, KeyDB

Cloud & HA: System Architecture Design, Failover, Disaster Recovery, Infra Automation

Programming & Scripting: Python, Bash, Django, PromQL

Problem-Solving: Troubleshooting, Incident Response, Root Cause Analysis
