

Aniket Kumar

DevOps Engineer | Platform Engineering | Cloud Infrastructure | SRE

Samastipur, Bihar, India • +91 9939093867 • aniket.kumar@hotmail.com • linkedin.com/in/crypticani • github.com/crypticani • crypticani.dev

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience building high-availability infrastructure, CI/CD automation, Kubernetes workloads, observability platforms, and database HA/DR systems across cloud and on-prem environments. Strong background in production operations, team leadership, cloud cost optimization, and DevSecOps practices including container vulnerability scanning.

TECHNICAL SKILLS

Cloud & Infrastructure: OCI, AWS, GCP, Linux, Nginx, Load Balancing, DNS, HA Architecture, Disaster Recovery, FinOps

Containers & CI/CD: Docker, Kubernetes, Docker Compose, Jenkins, GitLab CI, GitHub Actions, Grype

Observability & Databases: Prometheus, Grafana, Loki, Alertmanager, PromQL, PostgreSQL, MySQL, MongoDB, Redis, KeyDB, ClickHouse

Security, IAM & Programming: Keycloak, LDAP, SAML/OIDC, DevSecOps, Burp Suite, VAPT Fundamentals, Python, Bash, Go, Django/DRF, Ansible, Git

PROFESSIONAL EXPERIENCE

DevOps Engineer — KocharTech

Jun 2023 – Present

Amritsar, India

- Owned HA infrastructure, CI/CD, observability, and cloud operations for 15+ production apps, sustaining 99.9% uptime SLA across all client deployments.
- Led a team of 8 engineers/interns; introduced code reviews, runbooks, incident practices, and on-call rotation, reducing MTTR by 40%.
- Built Jenkins, GitLab CI, and GitHub Actions pipelines for automated build-test-deploy workflows, increasing release cadence from bi-weekly to multiple daily deployments.
- Containerized 20+ services with multi-stage Dockerfiles; managed Kubernetes workloads with rolling updates and zero-downtime releases, reducing image size by 60%.
- Integrated Grype-based container vulnerability scanning into CI/CD gates, enforcing security policies and reducing production vulnerability exposure by 90%.
- Designed HA data platforms: PostgreSQL + Patroni, MySQL Group Replication, MongoDB Replica Sets, ClickHouse, Redis Sentinel, and KeyDB with backup, PITR, and failover runbooks.
- Implemented DR automation with snapshots, cross-region backup replication, and recovery runbooks, achieving sub-30-minute RTO; optimized cloud spend by 25% via rightsizing and reserved capacity.

IT Intern — KocharTech

Jun 2022 – May 2023

Amritsar, India

- Built the organization's observability stack from scratch using Prometheus, Alertmanager, Grafana, Loki, and Fluent Bit across 100+ hosts and 200+ containers.
- Developed Python exporters and 15+ Grafana dashboards with PromQL panels for infrastructure health, application performance, and alerting.
- Automated Linux home-directory backups to AWS S3 and built a Django + MQTT device management portal for 50+ devices.

Full Stack Development Intern — TheCodeWork

Jun 2021 – Oct 2021

- Developed Django/DRF backend APIs and VueJS/TailwindCSS interfaces for a no-code application platform.

CERTIFICATIONS & EDUCATION

Certifications: Oracle Cloud Infrastructure 2025 Certified Architect Associate; Cloud Architecture – Google Cloud Skills Boost; Google IT Automation with Python – Coursera; Foundations of Project Management – Coursera

Education: MCA, Lovely Professional University, Punjab, 2021–2023, CGPA 8.97; BCA, Dev Sanskriti Vishwavidyalaya, Haridwar, 2018–2021, CGPA 8.0, Academic Excellence Award
